
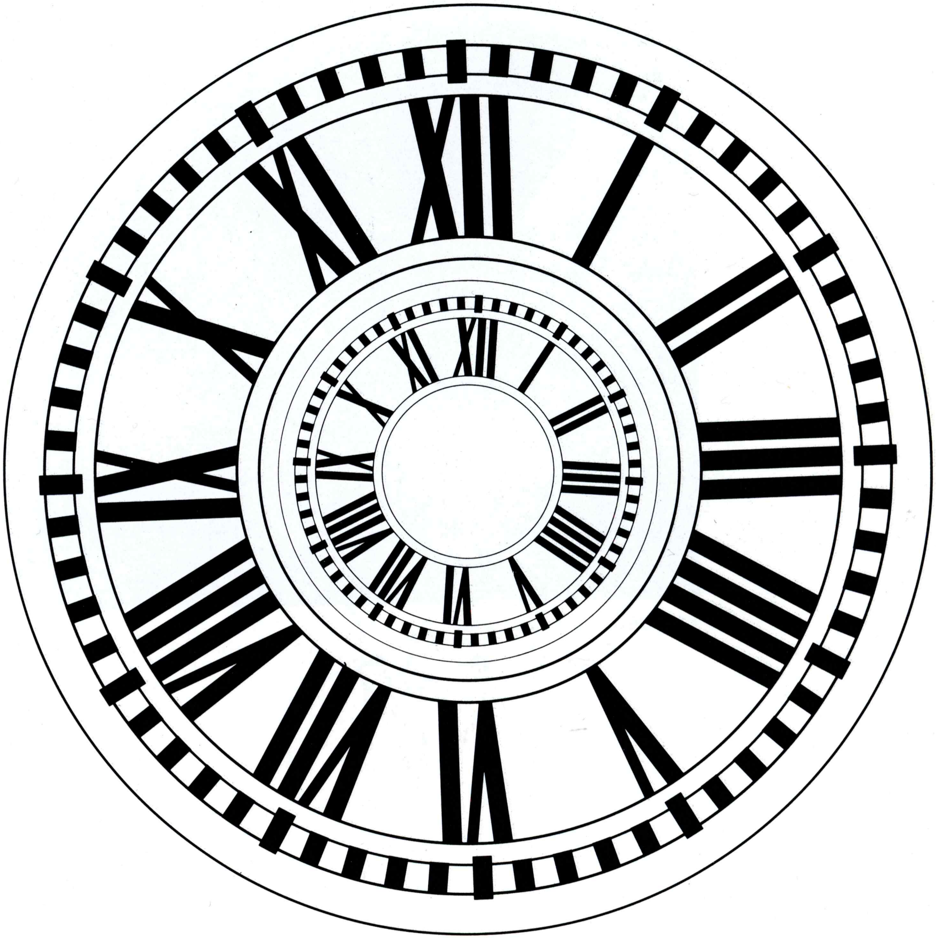
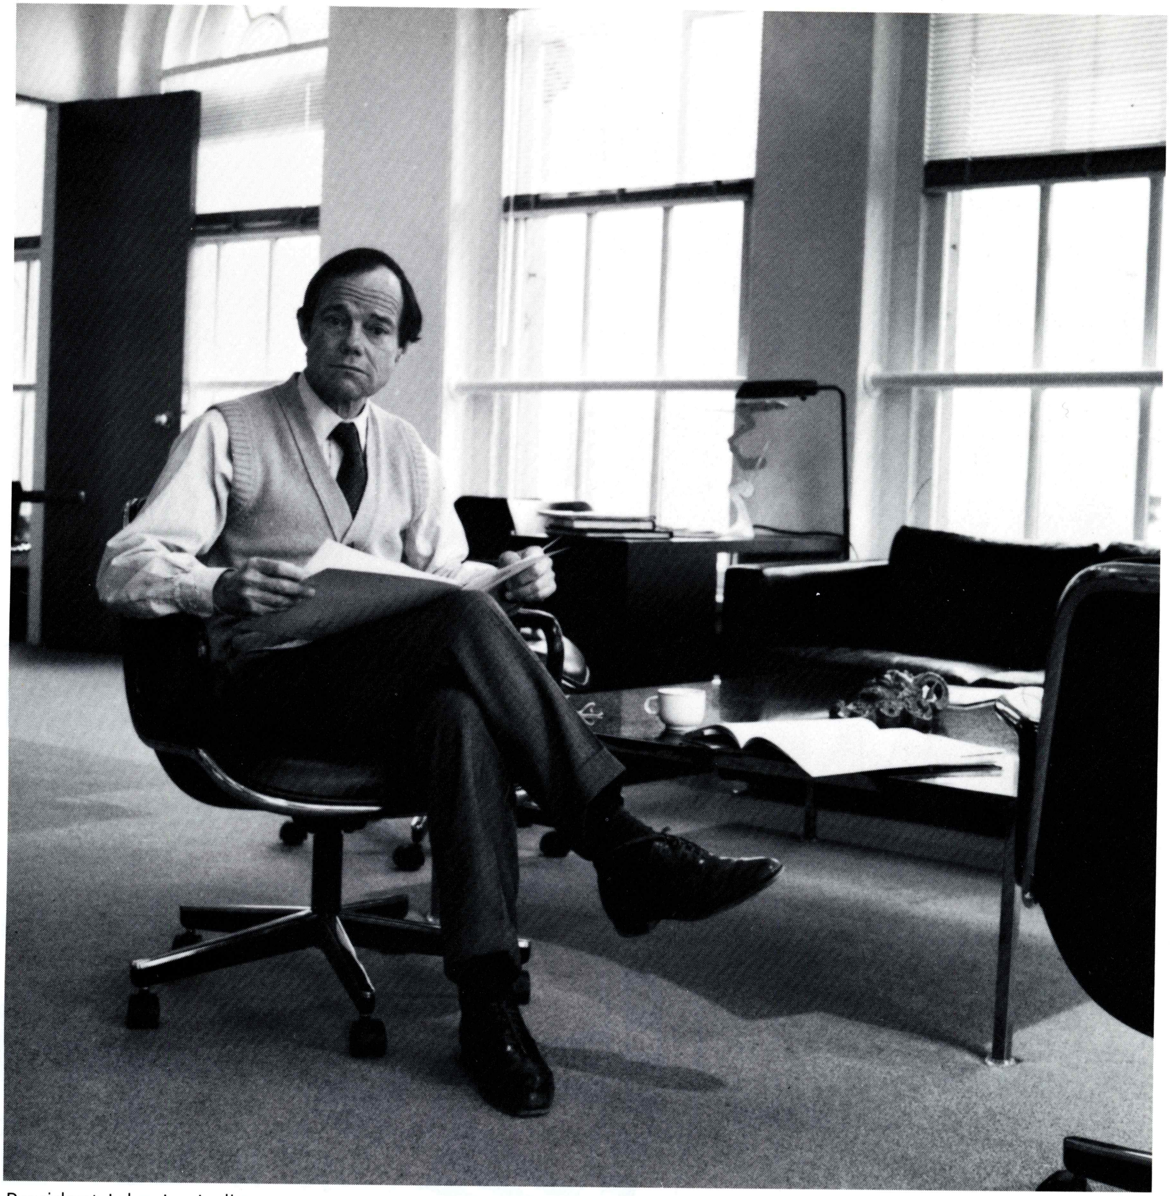
Cable

The Senior Class of 1993





President John Jay Iselin

A Trustworthy Pilot

On the centennial celebration of Peter Cooper's remarkable Union, a distinguished alumnus pronounced your College an exemplary pilot. In saluting Cooper Union's pioneering spirit, Associate Justice Felix Frankfurter was indeed prescient.

Today as then, your institution's educational leadership is much in demand.

In truth, Cooper Union's record of academic trailblazing has never been quite so challenged. On the occasion of your graduation, in the College's 133rd year, our City and country confront acute schooling disarray. The American idea of education, equity with excellence, seems to be stalled.

Once again, Cooper's honored reputation in higher education is but a prologue to furthering imaginative piloting.

Our founder's inspiration for the College originated in his disappointment over the City's public schooling. He was determined to establish an educational beacon of hope and opportunity.

Happily, that same educational signal of accessible learning still shines forth from Cooper Square.

Public Schooling's tailspin is not the only dilemma. Higher education is also confronting a quandary of purpose. Colleges and universities are increasingly criticized for costs that threaten equity. At the same time, higher learning is robustly critiqued for de-emphasizing the art of teaching.

When public confidence in its educational birthright begins to erode, this nation greatly needs a proven standard-bearer.

Higher education's public trust, its mission of equity with excellence, requires a trustworthy pilot. In undertaking that fresh duty, Cooper Union re-affirms its basic educational tenets:

An Educational Imperative: Linking outstanding teaching with sound research to nurture a first rate education.

A Moral Necessity: Encouraging an able heterogeneous student body in effective, fruitful learning.

A Civic Duty: Mobilizing knowledge to promote urban betterment through purposeful contributions.

An Historic Compact: Assuring a free, first-rate education by managing with accountability and frugality.

Cooper Union's past performance reflects an enduring ethic and common spirit. The admirable Class of 1993 stands at the core of our lively, dynamic collective, focused on today's and tomorrow's conundrums. Already, imaginative solutions.

Challenged, again, to chart a pioneering path and determined, to exemplify a college of the future, Cooper Union confidently looks to the creative leadership of 1993.

John Jay Iselin

We would like to dedicate the 1993 Cable to the memory of great men and women who are no longer with us. Their contributions will continue to inspire generations to come.

Among those we would like to acknowledge are **Arthur Ashe,** champion on and off the court. The first African-American to win Wimbledon, the U.S. Open and Australian Open and a fighter in the face of the AIDS virus. **John Cage,** poet, composer and pianist. Through his experimentation with sound he re-defined music. **Dizzy Gillespie,** jazz trumpeter, also known as the Ambassador of Music. Recognized by his puffed-out cheeks and bent trumpet, his creation of Be-bop changed the course of music. **Mother Hale,** who dedicated her life to the care and love of children inflicted with the AIDS virus. **Audrey Hepburn,** actress and UNICEF ambassador. Used her fame to better the living conditions of children around the world. **Thurgood Marshall,** the first African-American Supreme Court Justice. The fruits of his struggle for civil rights equity affected the lives of millions.

The commitment of these individuals and others is best summarized in the words of Thurgood Marshall, "I did the best I could with what I had."

Dizzy Gillespie, *The Cooper Union Great Hall*, 1990

Is insincerity such a terrible thing? I think not. It is merely a method by which we can multiply our personalities. Oscar Wilde

tree
the **word** is
roots suck logos as the
trunk saturates and
contains feeding the **limb** cantilevering over the vast
country connecting **branches** are dispersed to
produce **twigs** teaching life and
spring forth **buds** to receive light, the
word

I would like to thank first and foremost, God and His Son Jesus Christ! Also, all my brothers and sisters "in Christ," my parents Alfonso and Giuseppina, who have been the best parents anyone could ask for, my sisters and the rest of my Earthly family, my professors and friends at Cooper. Why? Because upon this graduation from Cooper Union it couldn't have happened without the help and endless effort of all the mentioned above in helping me build my building.

When the tides are turned against you,
And the current upsets your boat,
Don't waste your tears on what might have been,
Just lay on your back and float.
E.N.

It is not enough to teach a man a specialty. Through it, he may become a kind of useful machine but not a harmoniously developed personality. It is essential that the student acquire an understanding of and a lively feeling for values. He must acquire a vivid sense of the beautiful and of the morally good. Otherwise he- with his specialized knowledge- more closely resembles a well-trained dog than a harmoniously developed person. He must learn to understand the motives of human beings, their illusions, and their sufferings in order to acquire a proper relationship to individual fellow-men and to the community.
A.E.

Numerous are the academic chairs, but rare are wise and noble teachers. Numerous and large are the lecture halls, but far from numerous the young people who genuinely thirst for truth and justice. Numerous are the wares that nature produces by the dozen, but her choice products are few.

It's been a long and bumpy ride and at times tiresome. I would like to give thanks to Olódùmarè for bringing me and my family this far and pray for further guidance and protection. I would also give thanks to my brother and sisters Rotimi, Kemi, Bunmi and Alison and especially my mother Yvonne Sijuwade who pleaded with me to hang on when times where rough. I'm very happy I took her advice because it helped me to become somebody, "an architect". Thank you mummy! Finally, I would like to send a special prayer for the guardian spirit of my father, Koyeto Sijuwade, I know you will always be with us, daddy, guiding us from evil.
And special thanks to my family and friends.
Bye! Goodluck! Peace! See Ya!

My whole life has been to avoid falling into that pit where everything means so much that everything means nothing. As I sift through a handful of the sands of all time with too much and too little consideration, how can I justify to the ocean my handful of sand? I can only accept the pink and ivory shells that are left for me, shining in the sun, on that reflective shore. No lush jungle lies beside these sands as the ocean calculates time, scraping a moon-clock on the moistened shore with water colder or hotter than the weather. I will stumble into my ditch with shells shaded from the sun and translucent like the whites of unhealthy fingernails. The sand will have slipped away to be forgotten because the grains were so small, but I will stroll along the shore intoxicated by the scraping of the sea, contented, because I will have known nothing else.

Pull My Daisy

Pull my daisy
tip my cup
all my doors are open
cut my thoughts
for coconuts
all my eggs are broken
Jack my Arden
gate my shades
Woe my road is spoken
Silk my garden
rose my days
now my prayers awaken

Bone my shadow
dove my dreams
start my halo bleeding
Milk my mind &
make me cream
drink me when you're
ready
Hop my heart on
harp my height
seraphs hold me steady
hip my angel
hype my light
lay it on the needy

Heal the raindrop
sow the eye
bust my dust again
woe the worm
work the wise
dig my spade the same
stop the hoax
what's the hex
where's the wake
how's the hicks
take my golden

Say my oops
open my shell
bite my naked nut
roll my bones
ring my bell
call my worms to sup
pope my parts
pop my pot
raise my daisy up
poke my pap
pit my plum
let my gap be shut.

First of all, I have to say thanks Mom & Dad and Ed, for your love, support and tolerance these last four years. It was't easy, but- surprise! Somehow I've pulled it off again. Hopefully ther are some good surprises in store.

To my loyal friend and confidant Lou, what can I say, this Buds for you! Let me know when your Mom is making spinach pie.

Of course, let me not forget my favorite partners in crime: Kevin, Kris, Andy and Jessica. My best friends are always the ones I laugh with the hardest. If laughter has anything to do with health, you've improved mine considerably; or at least kept it from deteriorating during my fourth year sentence.

To Kathy, my favorite Bay Ridge neighbor, if we're ever in muffins at the same time, I'll buy you a drink. Boom shalock-lock boom!

To all the participants of loungefest and slackers everywhere, a few words of wisdom:

The Lord is not slack concerning His promise, as some men count slackness.
II Peter 3:9

Laugh and be fat, Sir, your penance is known,
They that love mirth, let them heartily drink
'Tis the only receipt to make sorrow sink.
Ben Johnson -Entertainments.

Someone once told me that finding your previous thoughts to be immature is a sign of mental progress... Actually, I think I said that.

Images of Cooper from 1990-1993

Sleepless nights, final's week, last minute study groups, continuos group projects, experiments that didn't work, weekly diet of carrots, pizza, and chocolate, weekend trips to Westchester to study, long train rides late at night, no social life, strange schedules with six hour breaks, hours of waiting for a computer, three hour lectures, last minute reports, and the list could go and on and on and on, but what made it worth it was the friendships and the wonderful memories that were established along the way. As Davie would say "God bless" and good luck to all my friends in your future endeavors.

To Mom, Dad and John - thanks to your infinite support, I've steered past one more chapter in my Odyssey. I love you all very much. I've learned a lot, got myself an education in life, and met some damn good people here. I owe my academic life to you, Davey; and my sanity to you, Miriam. Kris and Tony, thanks for the laughs: both on my account, and on everyone else's. The four of you made it all worthwhile (not really... but sure sounds nice if I say that). As for the rest of you: Nature Boy, Nauseous, Vince "the everbulging", Janet, Nora, Jamie and everyone else (except for the people who give me agita), thanks for making this the best and (not necessarily your fault worst) experience of my life! Listen to my words carefully: always face your opponent- you can admit defeat... just don't give him the satisfaction of surrendering. And one more thing: laugh, its always good for you. Peace...

Tony

Anthony M. Falcone
Civil Engineering

To Dad, Mom and sisters,
Without you I wouldn't have made it.
For these couple of years,
I have gained and lost so much.
I have gained happy memories
which never wear out;
but I have lost weight
which I can never gain back.

I live in a space of postcards and remnants of past events. Events that others forget. I am the curator There are moments when I wish I knew which way to turn my boat, which shore I really want to go towards. Rather than some old instinctive course - one that I can't remember where it leads to. I sail most often by the night. The rigging slapping the mast. The rudder lists in my hands. Out here the stars are so distant it's hard to determine if I've made any progress. In any direction. ACRIDOPHAGE. One who feeds on locusts. It appears that the taste of locusts resembles, if somewhat remotely, that of raw shrimps. ANALECT. Name given to the slave whose job it was to collect the remains of a meal. I am deaf to digital clocks, the sound of heat, or the bellow of bovine clouds. I wish I could here the words of fish, the conversation of ants, or the friction of shadows as they follow me everywhere. To candles. The dismantaling of old tenants homes. The lawyer's assistant, the will, the crates. The relatives wondering what they will get. And the rectangles of lightness left on the wall after the removal of the paintings. Milton's Lucifer; "The mind is its own place and in itself can make a heav'n of Hell, a Hell of Heaven..." On the way home, hunched, failing against elements greater than you - they always were - encountering machines vast as dinosaurs. Your lives, our dreams, your pasts, being shoveled down their hydraulic backsides. The whir, the clanging of heavy steel. Then, finally, its departure, its two men hanging onto its back, and its pause at the red light at the end of the street, before turning the corner. Going. Yesterdays trash. We start afresh. In the dark, semi awake, late at night, pretending to be protected by the dry opacity of dry contact lenses and sand building up on eyelashes, I feel change. I feel organs becoming brittle. Deep in the tissue veins and capillaries becoming tired. Weary of feeding: sore towards my body as a mother becomes to a child continually at her nipple; tugging, chewing, gnawing with toothless gums. So I feel them harden up, dry up. Firm and callouses. Turning, darkly. In the dark I feel systems shut down one by one. Innumerable, unmapped labyrinths of blood, of arteries, giving in to Time, as he crawls along, in rags and ghetto appearance. In the late night the dining halls - where the only cliental are the other waiters just getting off work, and young eighteen year old girls free for a brief moment from the desperate grip of parents - the banter is void. The direction is... exhaustion. Dreams, here, never exist. We are too tired to live our own, let alone another - one of dreams. The hum of the conversation is the same as the fluorescent lighting's; flickering, dim, fading. This is where dreams twist in on themselves, like guts, devouring reality. It's a time of centipedes. Of multitudes of little legs. Of the ever forward march of time. Of fear. The undistilled rawness of the fact. The moment. The slow crawl of the seconds. But as everything, there's the pause. The twitching tentacles, the wavering antennae. The waiting for the pounce. This is where I live. In that moment, where the face of time looms its exoskeleton face of cartilage plates over me. Outside, it began to rain. Death is water. Clear as a tear.

Zoos are full, prisons are overwhelmed, oh my ...how the world still dearly loves a cage.

Harold and Maude,
1971

Kris, Paul and Andy: Thanks for all the laughs and support.

Kevin: I'm looking forward to the day when we'll have to learn Esperanto just to keep a straight face. Morse code, maybe?

Durk: My puzzle is complete. I will always love you.

Mom: You are my first and best friend.

Josh: I hope you know how important you are. I love you both so much.

But suppose that walls rise towards heaven in such a way that I am moved. I perceive your intentions. Your mood has been gentle, brutal, charming, or noble. The stones you have erected tell me so. You fix me to the place and my eyes regard it. They behold something which expresses a thought. A thought which reveals itself without word or sound, but solely by means of shapes which stand in a certain relationship to another.

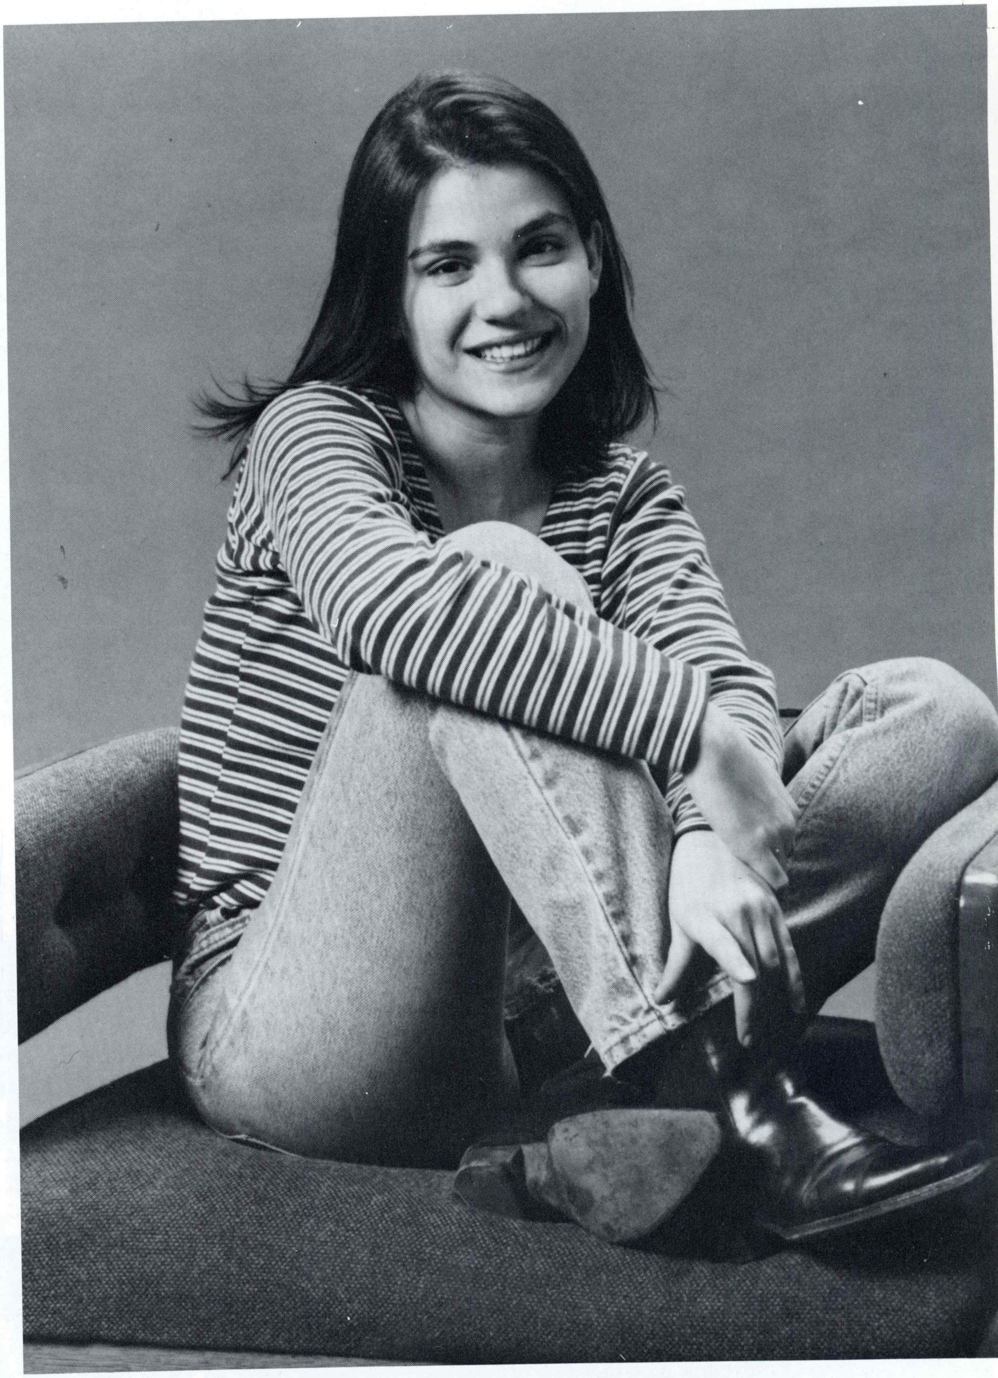
Just a few words before I go . . . *I am great.*

I guess now I should thank all the little people: Thank you Cooper for four great years and a lot of good friends. Pappy's Texas Wierners ... Coming out of the closet ... "I'm in a really weird mood, let's go annoy that man on the fourth floor."

Aph, thanks for putting up with me: "I should be on the cover of Cosmopolitan", need I say more? Maria, did I actually see you these last four years? Marisa, I think I saw you too much (B.S.P.) Leroy and Bessie, you guys are the best cows in the world.

Mom and Dad, thank you for everything you do. Even though I may not say it enough, I do appreciate you. You too, George.



Denise M. Fasanello

CONGRADULATIONS
TO ALL SURVIVORS!

Special Survivors

David, my best friend -
I couldn't have made it without
you. Honest, no joke!

Georgia, my ChE sister -
Ice skating, Mediterranean
restaurant, Mom's home cooking...
Thanks for great memories.

Jia, my shy bunny sister -
We made it through alive!!!
I meant Cooper, not Mt. Sutton.

Sarcasm and cyniciism are my
greatest traits. I don't know
how all of you can stand me!
I guess you're all terrific.
I DON'T THINK SO!

Your favorite friend,
Kristine

THE ONLY ONE

You are the only one who can make me smile,
you are the only one who can make me cry.
I love you dearly with all my heart,
I despise you deeply with all my pride.

As this love-hate cycle continues,
I begin to look back at what we've been through;
the good times that we had and the fights
that drove us apart,
I realized that I can't live with or without you.

Perhaps we weren't meant for each other,
maybe I'm not the right one.
But regardless of your feelings toward me,
I will always love you.

Goodbye to my SLACKER brothers,
my ASIAN brothers, and
my ZETA PSI brothers.

And There Was Much Rejoicing

I would like to thank my Mom, Dad, Missy & the entire family for their love and support for the last twenty one years.

I am grateful for Peter Cooper's vision of the "second to none" formal education which I have received and the opportunity to work with some of the most talented people I will ever meet.

To my friends from the Kearney years that are like family: Marianna (You were there and you can meet me at Zeke's anytime.), Dave (You're the goods.), Melina (If you can't see the cheese don't eat it.), Michele (A true beer makes its own friends.), Kelso (You're still popular.), Linda (My woman!), Ellen (What's the point of these cartoons?), Dan (Children should be seen and not heard.), Tom (Settle.), Chuck (DeKalb Ave. - Need I say more.), Paul (Take it off. Leave it on!), Pucci (No one sleeps!), and Ed (This is not Playtime. It's for your safety.), thanks for the good times at Virginia Beach, San Diego, Mexico, Mastic, New Year's Eve, etc. and standing by me as I rolled the bones.

The Sisters of Delta Eta, have given me my happiest memories here at Cooper (the semi-formals, skiing [here's to sleep Terri in '91], Daytona '92 with Driftwood and heinie "Outstanding!", the Houston House, laughing at Spyll), it's been great.

To the people that I've worked with on projects, always remember that "Jo Lies" and never say the word "radical" in a presentation: Janet, Alon, & Chris (we were the best), Athena, Joanne, & Nora (that's some coffee table), Andy & Paul (hold the 8# of tater tots please), & Tony-Tony (has done it again).

Take care Sonny, Twinkie, Slayer Man, Slackers, the guys on Squid, Traina, the Scoobie Doobies and the brothers that were there. CE's rule!
Congratulations to the Class of '93.
Make a difference people.

Deepest **LOVE** & *Heartfelt* **THANKS** to:

My personal Cooper dreamteam: **Frank "decision-maker" Cantelmi, Kris "sarcasm is an art" Monaco, Paul "Laup" Mortenson, Andy "Hamburglar" Rodko & Jessica "I'll learn Japanese for you" Sarlin**
Karen, Darlene & Jim for giving me the foundation and the courage to be myself
John Travis, Michele Lambrech, & Binghamton, NY: volumes could not contain what you mean to me
Thomas F. Mahoney, who taught me, at 17 years old, that anything I wanted in this world was possible
Tina Geiger for her *realism* & **Nadia Subaran** for her *idealism*
Bob & Brendan who "I Will Always..."
All my brothers in **Zeta Psi**
Molly "Goodtime" Horton, the CE goddess and my mentor
Dr. Peter Eisenman, Dr. Vito Guido, & Dr. Andrea Newmark, for joining the brave minority that believed in me
Kathie "Fitz" Donohue, Mr. Edward B. Fitzpatrick & all at FMA for being my sanctuary and my extended family
And of course my family: **Mom, Dad, Jimmy, Tommy, Danny, and Pop** for making it all possible

I never hesitate letting the above mentioned souls, and those dear people throughout my life, know that I love them. Some people believe if you say that too often it loses its meaning, or sounds ingenuine. They don't understand love and they don't know me!

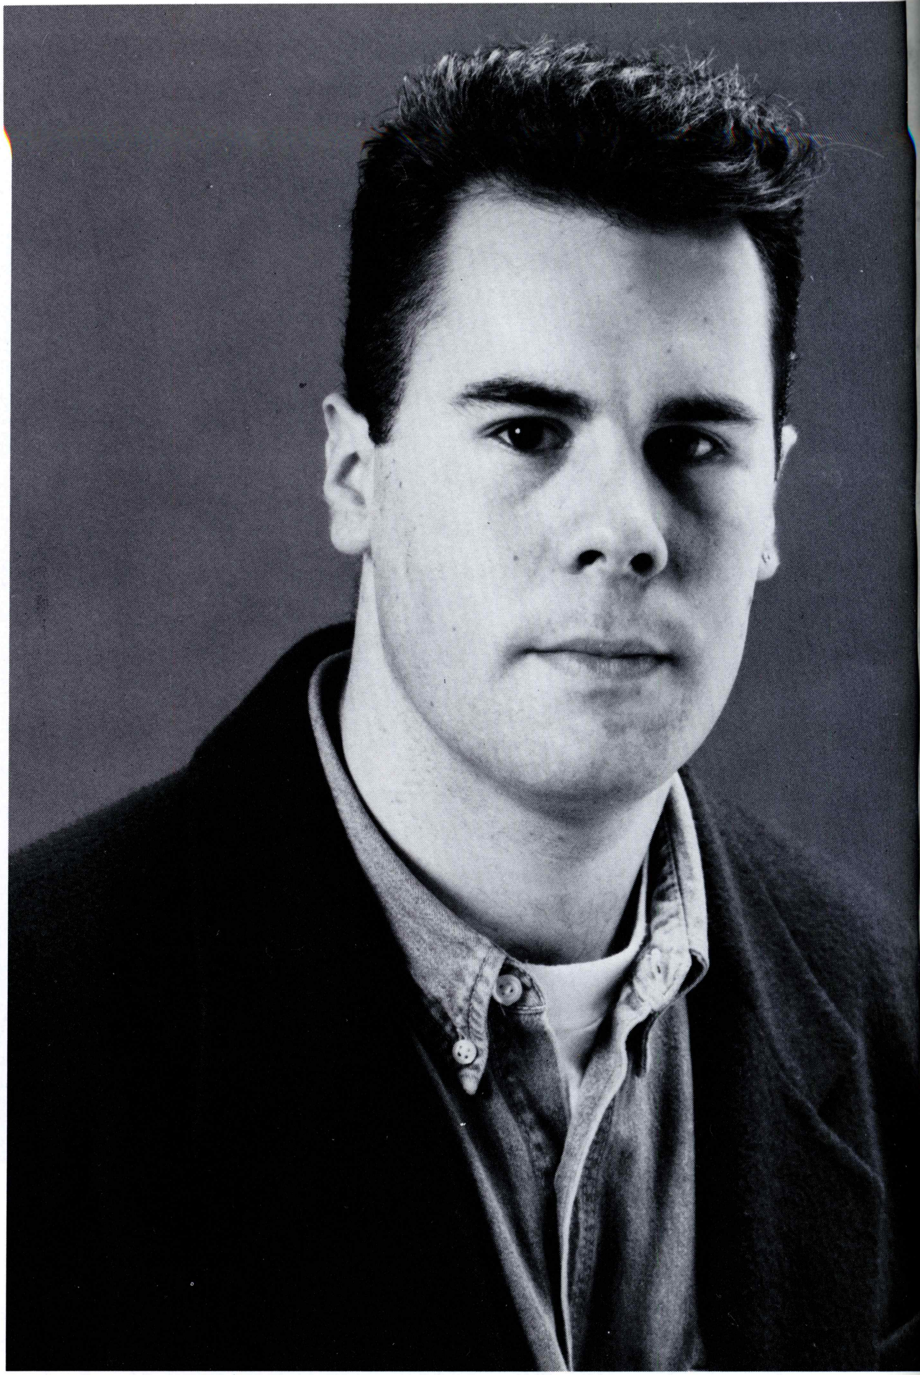
Winter Olympics,
Team USA 4 - USSR 3

Thank you mom and dad for all your help and support, especially over the last four years. I love you both.

I think like you that the great problems of the universe and of science have the first claim on our interest. But it is as a rule of very little use to form an express intention of devoting oneself to research into this or that great problem. It is more promising in the scientific work to attack whatever is immediately before one and offers an opportunity for research.

Sigmund Freud



Steven A. Caruso

These last four years at Cooper have been some of the best. I want to thank my family for supporting me and always being there for me. also want to thank my girlfriend, Catherine for making life fun. I'll always remember the times we spent together from the waterfront walks to the Japanese dinners. I want to thank my friends for all the good times, life at the dorms in 91-92, Baker's Dozen (Two Time Champs), intramural basketball and bowling, Mount Sutton, and just seeing everybody in school every day. I want to thank the administration and the professors who were always willing to put in the extra time for you. And last, but not least, I would like to thank The Lord for providing me with all these people and experiences.

> The truth is transparent and goes unnoticed, whereas lies are opaque and let in neither light nor gaze. There is a third version, where the two mix, and this is most customary. With one eye we see through the truth, and that gaze is lost forever in infinity; with the other eye we do not see even an inch through the lies, and that gaze can penetrate no further but remains on earth and ours; and so we push through life sideways. Hence, the truth cannot be understood on it's own, like a lie, but only by comparing it with lies...

To the Cooper public: This will be my last list.

From the home office in Vestal, N.Y.:
Top Ten Reasons Why I Am Graduating

10. All of my attempts to fail out have failed.
9. My library fines are paid.
8. Superman passed me.
7. My assasination attempt on my Organic Chemistry Professor by synthesizing TNT in Ch232 lab earned me an A.
6. I figured I'd get out while I was ahead.
5. My writing style has improved tremendously.
4. I am moving on to my next level of therapy.
3. By graduating, I prove that those people in high school who voted me "Most Likely to Succeed" were right,... finally.
2. Now I can loose the weight that I gained in this place.
1. "I have changed not in kind, but in degree."

Good bye and good looks - The Editor

To my parents: Thank you for allowing me time to heal and grow. I love you.

To Julie: I'll see you on the other side. You'll know what I mean when you get there. I can't wait. I love you, boob.

I want to dedicate this quote to all the denizens of Cooper Union. For making my life a lot more interesting beyond the call of duty, I like to thank Dave "The Twinkie" Arcement, Tony "The Tongue" Celentano, Tony Falcone (alias: Planter Head), Chris Monaco (alias: Fish), Alon "The Nature Boy", Chris Nauseous, Cathy Mac, all the other ladies of Civil Eng., all the Tau Delta Phi brothers, Stuuuu, Rich "What's the bottom line" Waaaaaaang, and the rest of the "slacker crew". I like to give special recognition to all my past lab partners, which without them, I wouldn't have reached the levels of panic that no man has gone before (S.K, P.G., Y.Y., J.S., C.V., etc...). I also like to thank my mom and dad and the rest of my family for supporting me throughout this adventure called Cooper Union. I want to state the high point of my Cooper Union tour of duty was meeting and dating my "Cutie". I would like to end this Cooper Union adventure by saying, **PEACE !**
